

Scenario Name – File Upload

Weak Prompt -Generate test cases for file upload

What I Feel is Missing -

- a. Did not mention about the supporting files to validate
- b. Did not mention about if we reupload the duplicate file with the same name – test case to handle it
- c. Security perspective- mandatorily certain types of files should not be uploaded
- d. Max size of the file
- e. Relevant column headers – mandatory values in them

I - Instruction

Generate manual test cases covering positive, negative, boundary, performance for uploading the Excel formatted file

File should not exceed 5 MB

All the column values are mandatory

Column Names should be in order – Sl. No, Name, Age, Gender, Location, mobile No

Don't allow duplicate files

C

Context

What is the application, environment, or domain?

Application is like regular ui application where the user can upload his basic personal details

E -Example

User uploads the pdf or excel file. Attaching the file here

TC001 | Upload an excel file with abc as name|Upload should be successful|Priority

P-Persona

Act as QA Engineer with 12 years of experience

O-Output Format

How should the output be structured? (Table, Gherkin, numbered list)

Provide results in a table with:

- Test Case ID

- Scenario
- Test Steps
- Test Data
- Expected Result
- Priority

T-Tone

Professional

Rewritten Prompt

Combine all ICEPOT components into your final prompt here:

1. Generate manual test cases covering positive, negative, boundary, performance for uploading the Excel formatted file
 - a. File should not exceed 5 MB

All the column values are mandatory

Column Names should be in order – Sl. No, Name, Age, Gender, Location, mobile No

Don't allow duplicate files

What is the application, environment, or domain?

Application is like regular ui application where the user can upload his basic personal details

2. User uploads the pdf or excel file. Attaching the file here

TC001 | Upload an excel file with abc as name|Upload should be successful|Priority

Act as QA Engineer with 12 years of experience

3. Provide results in a table with:

- Test Case ID
- Scenario
- Test Steps
- Test Data
- Expected Result
- Priority

4. Professional Tone

Weak Prompt- Generate test cases for file upload

File Upload Functionality – Manual Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC001	Upload valid file	1. Click Upload 2. Select valid file 3. Submit	report.pdf (2 MB)	File uploaded successfully	High
TC002	Upload supported PDF file	Select PDF and upload	report.pdf	Upload succeeds	High
TC003	Upload supported JPG image	Select JPG file and upload	image.jpg	Upload succeeds	High
TC004	Upload supported PNG image	Select PNG file and upload	image.png	Upload succeeds	High
TC005	Upload multiple files (if supported)	Select multiple files and upload	3 PDF files	All files uploaded successfully	High
TC006	Upload file using drag and drop	Drag file into upload area	report.pdf	File uploaded successfully	Medium
TC007	Upload file using browse option	Click Browse and select file	report.pdf	File uploaded successfully	High
TC008	Verify uploaded file name	Upload file and review details	report.pdf	Correct file name displayed	Medium
TC009	Verify uploaded file preview	Upload image file	image.jpg	Preview displayed correctly	Medium
TC010	Replace uploaded file	Upload file then upload another	report1.pdf, report2.pdf	New file replaces old file	Medium

Negative Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC011	Upload unsupported file type	Upload unsupported extension	test.exe	Validation message displayed	High
TC012	Upload file exceeding size limit	Upload file larger than limit	100 MB PDF	Error message displayed	High
TC013	Upload empty file	Upload 0 KB file	empty.pdf	Validation error displayed	Medium
TC014	Upload corrupted file	Upload damaged file	corrupted.pdf	Appropriate error message displayed	Medium
TC015	Upload file with invalid extension	Rename .exe to .pdf and upload	malware.pdf	File validation should fail	Critical
TC016	Upload without selecting file	Click Upload button	No file	Validation message displayed	High
TC017	Cancel file selection	Open file picker and cancel	N/A	No file uploaded	Low
TC018	Upload file with special characters in name	Upload file	test@#\$%.pdf	System handles filename correctly	Medium
TC019	Upload duplicate file	Upload same file twice	report.pdf	Behavior follows requirement (allow/block/warn)	Medium
TC020	Network interruption during upload	Disconnect network during upload	report.pdf	Error message displayed and upload fails gracefully	High

Boundary Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC021	Upload minimum size file	Upload smallest valid file	1 KB PDF	Upload succeeds	Medium
TC022	Upload maximum allowed file size	Upload file exactly at limit	10 MB PDF	Upload succeeds	High

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC023	Upload file just above limit	Upload file exceeding limit by 1 KB	10.001 MB PDF	Upload rejected	High
TC024	Upload maximum number of files allowed	Upload max count	10 files	Upload succeeds	Medium
TC025	Upload one file beyond max count	Upload max+1 files	11 files	Validation displayed	Medium
TC026	Upload file with maximum filename length	Upload file with long name	255-char filename	Upload succeeds	Medium
TC027	Upload file exceeding filename limit	Upload very long filename	300-char filename	Validation/error shown	Medium

Security Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC028	Upload executable file	Upload .exe file	setup.exe	Upload blocked	Critical
TC029	Upload script file	Upload JavaScript file	test.js	Upload blocked	Critical
TC030	Upload malicious file disguised as PDF	Rename executable to PDF	virus.pdf	File validation detects and blocks upload	Critical
TC031	Upload file containing XSS content	Upload HTML file with script	xss.html	Script should not execute	Critical
TC032	Verify access permissions	Upload file and access unauthorized account	report.pdf	Unauthorized access denied	Critical

Performance Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC033	Upload performance for small file	Upload small file	1 MB PDF	Upload completes within SLA	High

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC034	Upload performance for max-size file	Upload maximum allowed file	10 MB PDF	Upload completes within SLA	High
TC035	Concurrent uploads	Multiple users upload simultaneously	100 users	System remains stable	High
TC036	Multiple file upload performance	Upload multiple files	10 files	Upload completes successfully	High
TC037	Server recovery after failed upload	Force upload failure and retry	report.pdf	Retry succeeds without issues	Medium

Usability Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC038	Verify upload progress indicator	Upload large file	10 MB PDF	Progress bar displayed	Medium
TC039	Verify success message	Upload valid file	report.pdf	Success confirmation shown	Medium
TC040	Verify error message clarity	Upload invalid file	test.exe	User-friendly error displayed	Medium
TC041	Remove uploaded file	Upload then delete file	report.pdf	File removed successfully	Medium
TC042	Re-upload after deletion	Delete and upload again	report.pdf	Upload succeeds	Medium

These test cases provide **positive, negative, boundary, security, performance, and usability coverage** for a typical File Upload feature.

For Icepot:

Below is a comprehensive set of manual test cases for the **Excel File Upload functionality**.

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC001	Upload valid Excel file	1. Navigate to Upload page 2. Select valid Excel file 3. Click Upload	Employee_Data.xlsx (2 MB)	File uploaded successfully and records processed	High
TC002	Upload valid XLSX file with all mandatory columns	Upload Excel containing all required columns in correct order	Sl. No, Name, Age, Gender, Location, Mobile No	Upload successful	High
TC003	Upload valid XLS file (if supported)	Upload .xls file	Employee_Data.xls	Upload successful	Medium
TC004	Upload file exactly 5 MB	Upload file of size 5 MB	Employee_Data_5MB.xlsx	Upload successful	High
TC005	Upload file with single record	Upload Excel with one valid row	1 record	Upload successful	Medium
TC006	Upload file with multiple records	Upload Excel with multiple valid rows	1000 records	Upload successful	High
TC007	Verify uploaded data processing	Upload valid file and review imported records	Valid Excel file	All records imported correctly	High
TC008	Upload file with alphanumeric file name	Upload file	User_Data_2026.xlsx	Upload successful	Low

Column Validation Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC009	Verify mandatory column order	Upload file with correct column order	Sl. No, Name, Age, Gender, Location, Mobile No	Upload successful	High
TC010	Column order changed	Upload file with columns swapped	Name, Sl. No, Age, Gender, Location, Mobile No	Upload rejected with appropriate error	High
TC011	Missing "Sl. No" column	Upload file missing Sl. No	Missing column	Upload rejected	High
TC012	Missing "Name" column	Upload file missing Name	Missing column	Upload rejected	High
TC013	Missing "Age" column	Upload file missing Age	Missing column	Upload rejected	High
TC014	Missing "Gender" column	Upload file missing Gender	Missing column	Upload rejected	High
TC015	Missing "Location" column	Upload file missing Location	Missing column	Upload rejected	High
TC016	Missing "Mobile No" column	Upload file missing Mobile No	Missing column	Upload rejected	High
TC017	Additional unexpected column present	Upload file with extra column	Email column added	Upload rejected or handled as per requirement	Medium
TC018	Column name spelling mismatch	Upload file with incorrect column name	Mobile Number instead of Mobile No	Upload rejected	High
TC019	Column names in lowercase	Upload file with lowercase headers	sl. no, name, age	Validation handled as per requirement	Medium

Mandatory Field Validation

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC020	Blank Name value	Upload file with blank Name	Name = Blank	Upload rejected with row-level validation error	High
TC021	Blank Age value	Upload file with blank Age	Age = Blank	Upload rejected	High
TC022	Blank Gender value	Upload file with blank Gender	Gender = Blank	Upload rejected	High
TC023	Blank Location value	Upload file with blank Location	Location = Blank	Upload rejected	High
TC024	Blank Mobile No value	Upload file with blank Mobile No	Mobile No = Blank	Upload rejected	High
TC025	Blank Sl. No value	Upload file with blank Sl. No	Sl. No = Blank	Upload rejected	High
TC026	Multiple mandatory fields blank	Upload file with multiple blank columns	Name & Mobile No blank	Upload rejected with detailed validation errors	High

Negative Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC027	Upload PDF instead of Excel	Select PDF file and upload	User.pdf	Upload rejected	High
TC028	Upload TXT file	Upload unsupported file	Data.txt	Upload rejected	High
TC029	Upload CSV file	Upload CSV file	Data.csv	Upload rejected if only Excel allowed	Medium
TC030	Upload corrupted Excel file	Upload damaged file	Corrupted.xlsx	Error message displayed	High
TC031	Upload password-protected Excel	Upload encrypted file	Protected.xlsx	Upload rejected with proper message	Medium

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC032	Upload empty Excel file	Upload workbook without data	Empty.xlsx	Upload rejected	High
TC033	Upload Excel with only headers	Upload file containing headers only	No data rows	Validation message displayed	Medium
TC034	Upload without selecting file	Click Upload without file	N/A	Validation message displayed	High
TC035	Upload file with special characters in filename	Upload file	@#\$%^ .xlsx	System handles appropriately	Low

Duplicate File Validation

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC036	Upload same file twice	Upload file and re-upload same file	Employee_Data.xlsx	Duplicate file should be rejected	High
TC037	Upload duplicate file with renamed filename	Rename file and upload again	Employee_Data_Copy.xlsx	Duplicate content detection handled as per requirement	High
TC038	Upload duplicate file after successful processing	Upload processed file again	Employee_Data.xlsx	Duplicate upload blocked	High
TC039	Upload duplicate file after failed upload	Retry previously failed upload	Employee_Data.xlsx	Upload allowed if previous upload failed	Medium

Boundary Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC040	File size just below limit	Upload file of 4.99 MB	Data.xlsx	Upload successful	High

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC041	File size exactly at limit	Upload file of 5 MB	Data.xlsx	Upload successful	High
TC042	File size just above limit	Upload file of 5.01 MB	Data.xlsx	Upload rejected	High
TC043	Maximum row count supported	Upload file with max allowed records	50,000 rows (example)	Upload successful	Medium
TC044	Exceed maximum row count	Upload file beyond supported rows	50,001 rows	Validation/error displayed	Medium
TC045	Maximum allowed mobile number length	Upload valid maximum length mobile number	10 digits	Upload successful	Medium

Performance Test Cases

Test Case ID	Scenario	Test Steps	Test Data	Expected Result	Priority
TC046	Upload performance for 5 MB file	Upload max-size file	5 MB Excel	Upload completes within defined SLA	High
TC047	Large record processing performance	Upload file with thousands of records	10,000+ rows	Processing completes within SLA	High
TC048	Concurrent uploads	Multiple users upload files simultaneously	100+ users	System remains stable and responsive	High
TC049	Duplicate file validation performance	Upload previously uploaded file	Duplicate file	Duplicate check completed quickly without delay	Medium
TC050	System recovery after upload failure	Interrupt upload and retry	5 MB Excel	Retry succeeds without data corruption	Medium

Assumptions

Supported format: .xlsx (and .xls if business allows)

Mandatory columns (in exact order):

1. Sl. No
2. Name
3. Age
4. Gender
5. Location
6. Mobile No

File size limit: ≤ 5 MB

Duplicate files: Not allowed

These test cases cover **Positive, Negative, Boundary, Data Validation, Duplicate Validation, and Performance scenarios** expected from a senior QA review perspective.

My Observation:

1. Weak prompt is very vague and generic and did not set any file types to upload
2. Earlier we did not mention about the file size- we may have ended up wrongly uploading the data with huge size and system may crash.
3. Roles for upload – who can upload and who should not -was not mentioned earlier
